Oreste BARAGAHORANA

Chairperson of CEPAR

Technical Specifications for Pesticide: CABRIO EC with Pyraclostrobin 250g/Ltr for the control of Coffee diseases in Rwanda

1. Product Profile.

Trade name: Cabrio 250EC
Active ingredient: Pyraclostrobin 250g/L
Formulation: Emulsifiable Concentrate
Chemical family: Strobilurin

2. Quantities: 800 litres of Cabrio 250 EC.

3. General conditions

1. The bidders are required to give a written commitment in respect of “ *International conduct code for the distribution and usage of pesticides* ” of FAO (annex 3) and to conform (by writing) that they accept the obligations regarding their responsibility for the product supplied.
2. The bidders **SHOULD** provide a valid certificate from **Rwanda Inspectorate, Competition and Consumer Protection Authority (RICA)** confirming the registration of that pesticide for the purpose controlling **Coffee Berry Disease** (*Colletotrichum kahawae*) and **Leaf Rust** (*Hemileia vastatrix*) based on the locally carried out tests.
3. The Bidders are required to provide a declaration on the composition of the product showing:
 - The content of active component; the solvents and other additives content; and the impurities content in active ingredient.
 - The name of the true manufacturer of the active ingredient.

4. Information on product quality

1. Regardless of whoever are the manufacturers, distributors or agents the bidders must show that the product offered complies with the FAO specifications (by providing a complete report from a certified laboratory) the “GLP” Good Laboratory Practices.
2. The product should remain with expiration date of more than **1 year and a half** from the date of delivery.

5. Conditions for packaging

Bidders must undertake:

- All of the packaging (external cartons and containers) must conform to article 10 of “International conduct code of distribution and utilization of Pesticides of the FAO.”
- Sealing of containers should be sufficiently tight so as to avoid any leakage.
- Cartons will play a role of secondary protection of containers at the time of handling, stacking and transport.
- Cartons should be rigid enough to resist to damages which may occur on content.
- Containers will have a liquid content of **1 Litre max**; should be plastic jerry cans or made of stainless-steel having an interior surface coated with anti-corrosion agent and should resist diffusion of the product.
- Containers should allow for easy handling with minimal risk of exposure to users.
- Containers should have strong handles.

- Measuring dispensers adapted to local conditions (dosers or graduated-cap in ml) must be provided at the rate of 1 measuring device per 1 Litre.

6. Conditions for labeling.

Bidders should undertake:

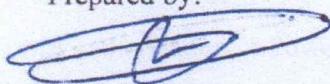

- Labeling of product in order to confirm with Article 10 of International conduct code of distribution and utilization of Pesticides of FAO
- Labeling of the product is printed with indelible (permanent) and weather- resisting ink.
- Labeling of the product should comply with the color code of OMS and have required pictograms.
- Labels should be printed in Kinyarwanda, French, English or both.
- **Labeling of products will have following information:**
 - AO and batch number.
 - Product name
 - Identification and concentration of active component.
 - Formulation
 - Description and concentration of solvents
 - Net contents.
 - Date of formulation and batch number.
 - Lifespan of the product.
 - Uses for the product.
 - Directions for use (application rates, preparation...)
 - Safety date on storage.
 - Directions for safe handling, storing, transporting.
 - Safety advice, first aid treatments, antidotes, medical advice and legal responsibilities.
 - Directions for storage.
 - Recommendations for disposal of packaging material
 - Name and address of the manufacturer as supplier or agent.

8. Conditions relating to supply of products

When the tender is launched, successful bidder is required to sign a commitment that s/he will supply the required quantities of products in accordance with the specifications and the requirements given in the present tender document.
